BOX CONTENT:

- EM4591
- UTP cable
- CD-Rom with manual
- QIG

Universal Wi-Fi-repeater with WPS

Easily increase wireless network coverage throughout your home

DESCRIPTION

The Eminent EM4591 Universal Wi-Fi-repeater increases your wireless network coverage. The Repeater has a WPS button which makes the setup very easy, without complicated settings in your router or repeater. By the built-in power connector you can put the Wi-Fi-repeater directly into the power outlet. This is the most easy way to increase your wireless network coverage in your home or office!

Location indicator

The built-in power plug allows placement of the EM4591 directly into the power socket. The Wi-Fi signal indicator of the EM4591 indicates the best place to locate the repeater.

Easy setup with WPS

Because of the WPS (Wi-Fi Protected Setup) function on the Eminent EM4591, the installation can be performed without complicated settings. Press the WPS button on your router, then press the WPS button on the Eminent Wi-Fi repeater and the installation is completed! You can also do the setup manually on the EM4591 by the built-in web interface or even with your tablet and smartphone.

Works with any wireless router

The Eminent Wi-Fi repeater uses the 300N standard. This standard is compatible with all common routers. This will make the Wi-Fi repeater universally applicable.

Additional network port

The EM4591 can also be used as an access point. The Eminent EM4591 can not only be used as a repeater, but you can also connect a device with a wired network connection.

The Eminent EM4591 Universal Wi-Fi Repeater comes with a 5 year warranty.
