DESCRIPTION

Watch at home or on the go videos and photos wireless at your iPad, iPod or iPhone via the EM4610 WiFi Travel Reader. You simply have to connect your USB-stick or SD-card to the WiFi Travel Reader. This compact WiFi Travel Reader also functions as a WiFi hotspot and WiFi repeater. You can use the EM4610 everywhere by means of the internal battery.

Expandable storage with a SD-card and USB-stick

iPad, iPod and iPhone does not support USB-ports. Watch and share all your files from an USB-stick wireless with your iPad, iPod and iPhone via the WiFi Travel Reader. Without the mediation of iTunes.

Watch your pictures directly

Use the EM4610 for watching your freshly made pictures directly on your iPad, iPod and iPhone, without the mediation of iTunes. Insert the SD-card in the WiFi Travel Reader. Watch and share your pictures immediately.

Back up your files

Watch the files from an USB-stick or SD-card via the special IOS app. Your files are more accessible in this way. Transfer easily pictures from your iPad, iPod and iPhone to your USB-stick or SD-card.

WiFi hotspot: share your Internet connection

As if the above features were not enough, the EM4610 still covers more functions. When you have access to Internet through a wired connection only, the EM4610 creates a WiFi hotspot. You only have to plug the UTP-cable in the WAN-port whereupon the EM4610 creates a WiFi hotspot for your Apple device. This connection can be shared with other devices at the same time.

WiFi repeater: increase your wireless network coverage

The WiFi Travel Reader increases the coverage of your wireless network. The WiFi Travel Reader increases the coverage of the existing wireless network. In this way you also will have wireless Internet when you're just out of reach of your standard wireless Internet connection.

Portable: take the WiFi Travel Reader along with you

The WiFi Travel Reader has got an internal battery, so you do not need an external power source. The WiFi Travel Reader can be used wherever you are. You can easily charge the battery via the mini USB-port at the reader itself. You can check the battery status via the LED light.

Unique design

The WiFi Travel Reader does not take much place by its compact design. You can easily take it along. The EM4610 is the perfect accessory for your Apple devices by its modern look
